

Chen Jil

OIA-61/78
17 July 1978

MEMORANDUM FOR: Director of Development and Engineering, DDS&T

SUBJECT : Letter of Appreciation and Commendation -
[redacted] IESD, SAG/OD&E

I wish to express my appreciation to the Imagery Exploitation Systems Division for the continuing support you provide to the Office of Imagery Analysis. I am particularly appreciative of your efforts since early-1975 when OIA--due to certain changes in the collection systems and in our own operating procedures--began a program to update our photogrammetric instrumentation. Much of the success of this program, now about 75 percent completed, can be attributed to IESD's efforts on our behalf.

I also wish to commend the individual effort of [redacted] of the IESD. [redacted] has served as the project officer for each of the instruments involved in OIA's photogrammetry program. [redacted] concern in matching the requirements of this office with the technical capabilities of the instrument manufacturers have resulted in some of the finest mensuration equipment available in the intelligence community today. His managerial abilities in developing excellent communications between the customer and the contractor, while protecting the contracting officer's prerogatives also deserves recognition. In short, [redacted] technical ability, professionalism, and dedication have reflected credit upon himself, his office, and the Agency.

Again my appreciation for your continuing support to the Office of Imagery Analysis.

[redacted]
Noel E. Firth
Director
Imagery Analysis
